Card of Thanks

Mr. and Mrs. K. H. Acord, and son, John Emmott, acknowledge with deep gratitude the many expressions of sympathy and acts of kindness directed toward them by friends, neighbors, the high school, and all organizations who so freely helped them at the time of the sudden death of their son Kenneth Taylor Acord.

and Mrs. M. L. Darling, Dorothy Darling Price, Richard Darling and Marguerite Darling, wish to express their gratitude to their friends who were so kind to them during the dark hours of bereavement; also for the last lovely tribute of flowers sent to Donald and Taylor.

We wish to express our deep appreciation of the sympathy and assistance rendered us at the time of our recent bereavement. Mrs. H. J. Ludwig, Herman Ludwig, Louise Ludwig, Gordon Ludwig.

NEW RECIPES

By Betty Barclay Every once in a while I come across some new recipes that are so delicious they must be passed on to my readers. Here are two:

LEMON ICEBERGS 2 cups sugar 3 cups boiling water 1/2 cup lemon juice Green vegetable coloring Fancy lemon slices Dissolve sugar in water. Cool. Add lemon juice and vegetable coloring. Pour in tray of iceless refrigerator, first placing in each cube compartment a quarter or half lemon slice or a small piece of lemon cut in some fancy shape, as a fan or cross. Freeze 3 hours. Serve for the ice cubes used to chill iced tea, lemonade or any fruit beverage.

ORANGE NUT WHIP 1 cup whipping cream 1 cup powdered peanut brittle 1 cup orange pulp Whip cream till stiff, fold in peanut brittle, which has been rolled or pounded to a powder. Then add orange sections, from which all membrane has been removed, and which have been cut in smaller pieces. Serve at once. This is enough for 6 to 8.

PICKLING FRUIT By Betty Barclay Yes! Even fruit may be turned into pickles or catsup—and certain berries as well. Here are two recipes that may well be added to anybody's pickling file:

ORANGE SWEET PICKLE 1 oranges 2 cups sugar 1 1/3 cups vinegar 1 teaspoon whole cloves 1 teaspoon stick cinnamon Peel oranges, removing all white membrane; cut into thick slices; steam until clear and tender. Boil sugar, vinegar and spices for 25 minutes. Add fruit and simmer slowly for one hour. Place in sterilized jars and seal.

LEMON CATSUP Grated rind of 1 lemons Juice of 1 lemons 1 tablespoon grated horseradish 1 teaspoon salt 2 teaspoons white mustard seed 2 teaspoons celery seed 4 cloves Few blades mace Few grains red pepper. Mix ingredients; boil thirty-five minutes, and bottle while hot. Let stand five or six weeks to ripen. Serve with fish.

Torrance Water, Light and Power Company Torrance, California

October 30th, 1929.

City Council, Torrance, California. Gentlemen:—

Under date of October 14th, 1929, we addressed a letter to you discussing the Torrance water situation. Since that date we have made a further study looking toward remedying the objectionable conditions at Torrance and have also undertaken an investigation of the practicability of the City of Torrance building an entirely new system with the thought that this study would be of assistance to your water committee in the preparation of its report. This report we understand was to follow the outline suggested for investigation by the Chamber of Commerce resolution of July 15th. We understand, however, that the Committee has already presented a preliminary report to you, which report does not deal, except in a casual way, with the question of the physical condition and worth of the present properties of the Torrance Water, Light and Power Company. The third recommendation of the Chamber of Commerce was that "a thorough analysis of the physical condition, worth and seller's cost of the present properties of the Torrance Water, Light and Power Company, if it is considered advisable to acquire this system as a part of the projected municipal development," be made. We believe that this point should be investigated to determine the advisability of acquisition of this system as against the proposal to build an entirely new distribution system and we do not believe that any definite recommendation can be made either way until this point has been investigated.

We have had made by the Loveland Engineers, Inc. a study of the probable cost to the City of installing an entirely new distribution system, source of supply and storage facilities, also of the cost of operation of such a system by the City. This was undertaken without knowledge of the fact that your Committee was making a similar investigation and the report, which has just been completed and a copy of which is enclosed, discloses certain differences in conclusion reached both as to operation and cost. Briefly, the report submitted by the Loveland Engineers, Inc., states that the minimum total cost of such a plant to the City will be approximately \$500,000.00, requiring a bond issue of this amount. The analysis of Expenses and Revenues to be derived on the basis of the present rates charged by the Torrance Water, Light and Power Company shows an insufficient balance available to provide for interest payments on a bond issue of this amount and for amortization of the bonds. It is therefore evident that it would be impossible for the city to build a new system without increasing the present rates, unless the burden of excess charges is permitted to fall upon the property owners through increased taxes instead of upon the water consumers where it properly belongs.

Another important factor to consider is the serious inconvenience and loss of business which would be experienced by your local business people, as well as the inconvenience to the citizens occasioned by torn up paving throughout the city for months during the period of construction of a new system.

We would like to point out that there is considerable conflict of expert opinion in all of the studies made of the possibility of securing an adequate supply of good water for the present and future needs of Torrance in Torrance or the immediate vicinity. Therefore, the attempted development of such a supply involves a considerable financial risk either to the City or the Torrance Water, Light and Power Company.

There has been some discussion at various times as to the conditions of the mains of the Torrance Water, Light and Power Company, and during the past week we have had a piece of pipe taken from a section of our lines in order to examine its condition. This section was removed under the observation of the Loveland Engineers, Inc., and a chemist from Smith-Emery Company. A bacteriological analysis of the interior of this section was subsequently made in the Smith-Emery laboratory and their report discloses a very satisfactory condition. A copy of this report is enclosed herewith. This particular section of pipe has been in service for seventeen years, while the major portion of the distribution system has been constructed since that date. In fact this particular section is one of the oldest in use in Torrance.

In order to further aid your Committee we would be glad to have the City Engineer select locations where a number of cuts can be made into our mains and sections removed for inspection by the City. The one already removed is available for inspection.

Complete maps of our distribution system showing sizes and types of lines are available at our office. We would be very glad to have your Committee submit a map of this system to any competent water works engineer for opinion as to its adequacy, both as to size and ability to provide proper circulation. We have already had two engineering reports concerning this phase both of which were to the effect that the system was entirely adequate in all respects.

We will be glad to render any further assistance to your Committee which they may desire.

Very truly yours,

Torrance Water, Light and Power Company

By A. J. ROBERTI, General Manager.

FIVE MINUTE DESSERTS

Quite often one desires a recipe by which a tasteful dessert may be turned out quickly. It may be wash day, unexpected guests may have arrived, or perhaps you have come home from a shopping jaunt and find the hands of the clock much farther advanced than you anticipated.

Fancy cakes and cookies can be made with a minimum of time and trouble by melting marshmallows, peanut brittle, nougat or caramels, over hot water and adding to wafers. For instance: Saltine wafers may be spread with marshmallows, topped with chopped nuts, and browned in the oven. Vanilla snaps may be put together as a sandwich with peanut brittle or caramels, softened to spread. Ginger snaps make a good combination with a sandwich filling of soft-ened nougat, while many of the candies sold in small packages may be melted and added to a sauce for ice cream, or added to a simple foundation filling for cake.

Or drop three or four candles of different colors in the center of your half grapefruit—instead of sugar. Let them dissolve and sweeten the fruit, and give it a little different flavor than usual.

Many devices for making drip coffee are on the market. If you have none, you can use a drip bag with a wire holder on an ordinary coffee pot. The coffee should be ground fine—not coarser than corn meal—and the water poured through while still boiling.

THREE WAYS TO MAKE COFFEE By Betty Barclay

There are three ways to make coffee and good coffee can be made by any one of them provided a little care is taken by the cook. But be certain your coffee is fresh, measure it a tablespoonful to the cup of water, and serve while hot. Do not let your coffee cook; it roasts all the cooking necessary in roasting.

Percolator If a percolator is used, the coffee should be ground a little coarser than corn meal. Package coffee can be obtained in the proper grind or your coffee merchant will grind it for you. The length of percolation depends upon the de-

gree of heat applied. This can be determined by observation, but when it is once ascertained stick to it. Too long or too short percolation affects the taste.

Put the ground coffee into the water and bring to a boil. Immediately reduce the heat and let steep from three to five minutes.

Mr. and Mrs. W. J. Neff were dinner guests of Mr. and Mrs. B. B. Perry of Long Beach Sunday.

J. S. King, 815 Cota avenue, has been confined to his home on account of sickness for the past few days.
